## Summary

Energetic frontend web developer with some backend experience looking for employment to join a team that delivers outstanding websites & experiences through engaging customer interaction & efficient behind-the-scenes work. I'm eager to work in an environment that encourages collaboration to overcome challenging obstacles. Some of my best work is showcased on my portfolio.

## Skills

HTML, CSS, SCSS, Hugo, JavaScript, React.js, Astro, Express, Mongoose, MongoDB, EJS, GIT, CI/CD, Responsive Web Design, Webpack, debugging, creativity, visual thinking, communication, collaboration, self-motivated

## Work Experience

*Freelance Web Developer* • **Freelance, Los Angeles, CA**

**January 2022 - Present**

- Developed several front end & full-stack applications with a variety of languages, frameworks, tools, etc.
- Forged professional relationships with clients to bring their visions to life in a timely manner.
- Implemented up-to-date coding methods and standards, whilst continuously studying to advance my career.

## Projects

### Wendy Kauderer's Artist Portfolio

- Redesigned her portfolio with Astro, JavaScript templating, React, CSS, Tailwind CSS, and React.
- Cut load times by around 85%, bringing responsiveness, and while adding modern accessible React libraries.
- Implemented React components for form validation, theme switching, and a gallery lightbox.

### Public Journal

- Developed a social site for journal entries w/ Express, EJS, TinyMCE, CSS, Bulma, Mongoose, and MongoDB.
- Integrated user and anonymous user authentication with Passport middleware.
- Implemented CRUD operations without any character or time limit.

### the sykstem boutique

- Developed an e-commerce shop with Hugo, HTML, CSS, Bulma, JavaScript, and Snipcart.
- Integrated the Snipcart e-commerce API for use with the database of products.
- Implemented sorting and filters on color, price, returning at least 1 item and added a storage for loved items.

### TODO

- Developed a minimal task list app utilizing Express, EJS, CSS, Bulma, Mongoose, and MongoDB.
- Implemented CRUD operations, creation of multiple lists, a completed list for each list, and a color picker.
